*Snell air cushion veterinary systems have been supplied to-  
**45 COUNTRIES over 25 YEARS***

**SNELL HYDRAULIC TABLES-** with air cushions for patient support and retention

**HP714**  
exceptional full length close access

■ Air cushioning to minimise patient pressure problems and retention

■ Infinitely variable in dorsal and lateral recumbency modes,

■ Exceptional full length close access

■ High corrosion resistance

■ Tough, stable and long trouble free life

■ Exceptional clean lines for hygiene

**HP712** (without cushions in place) in lateral mode

- very low closed height of 21cm (8.1/4 ins)

**HP712**  
very clean lines

**SNELL INFLA-TABLES-** a range of air cushion tables for dorsal and lateral procedures; used in many situations including surgeries, combined surgery/recovery rooms, in the field. The patient is quickly raised from floor to the required height by an electrical inflator.

Model **P554**, set for dorsal recumbency; quickly changed to lateral

Patients are rolled onto deflated tables or raised by hoist

**P554** in combined surgery/recovery room, Saudi Arabia

Excellent retention in dorsal recumbency

**SNELL INFLA-TOPS & OPTIONS-** a range of standard and purpose designed air cushion assemblies in many forms (including troughs) for customer's existing tables and surgery surfaces.

Designed by Snell in conjunction with leading specialists in the profession. Quality British build-incorporating high specification polyurethane coated fabrics and stainless steel for long service life

**Selected by- Olympic committees- Barcelona, Atlanta, and Athens- Also WHE Malaysia 2008**
